Paritosh Barman

Full Stack Developer

Portfolio: Portfolio
github.com/ParitoshBarman
linkedin.com/in/paritosh-barm...

Full Stack Developer with strong expertise in building scalable, production-grade web applications and high-performance backend systems using the JavaScript ecosystem (React, Next.js, Node.js, Express, PostgreSQL, Prisma) and Python. Former Full Stack Developer at DesignDot Technologies, with proven experience in developing enterprise-level web platforms, real-time tracking systems, and automated workflows. Adept at translating complex business requirements into robust software solutions with a product-focused, end-to-end approach—from system architecture and API design to seamless deployment. Known for rapid adaptability, system ownership, and delivering clean, maintainable code.

Skills

Frontend	HTML, CSS, JavaScript (ES6+), React, Next.js, TypeScript, Redux, Redux Toolkit
Backend	Node.js, Express, REST APIs, PostgreSQL, MySQL, MongoDB, Prisma, Mongoose, JWT, RBAC
Earlier Exposure	C, Python, OpenCV, Django, Flask, Selenium, Tkinter, AWS EC2, IoT & Electronics
Soft Skills	Problem Solving, Requirement Analysis, Adaptability, Collaboration

Certifications

- **Masai x to10x Hackathon (Edition 3)** — Project-based participation [Certificate]
- **7-Day LinkedIn Challenge** — Prepleaf by Masai School [Certificate]
- **Python Programming** — Think NEXT Technologies Pvt. Ltd. [Certificate]

Experience

Independent Software Developer **Apr 2026 — Present**
Maglev Softwares *Remote*

- Developing full-stack business software, CRM systems, admin dashboards, and workflow automation using the JavaScript ecosystem.
- Building AI-powered CRM features using Google's Gemini API to research businesses, analyze potential customer needs, and generate personalized outreach emails.
- Developing Maglev AI Vision, a computer vision platform for industrial safety, vehicle detection, and real-time event monitoring.

Full Stack Developer **Sep 2025 — Apr 2026**
DesignDot Technologies Pvt. Ltd. *Remote*

- Worked as a Full Stack Developer on production-ready web applications using the JavaScript ecosystem.
- Developed frontend interfaces with React.js, TypeScript and Next.js, and backend services using Node.js and Express.
- Designed and integrated REST APIs with PostgreSQL, MySQL, and MongoDB.
- Implemented authentication and authorization using JWT and role-based access control (RBAC).
- Collaborated with team members to deliver features, fix bugs, and maintain code quality in production systems.

Client Projects / Independent Development **2024 — 2025**
Multiple Business Clients *India*

- Developed multiple full-stack web applications across diverse business domains using modern web technologies.
- Built custom platforms including real-time geolocation tracking systems, and business management applications.
- Implemented secure authentication, responsive UI/UX, client-specific features (PDF generation, SMTP), and managed end-to-end deployment and iterative improvements.

Personal Projects

Local Democracy Platform (Personal Project) **May 2025**
Civic Engagement & Voting Platform

- Designed and developed a full-stack platform to support civic engagement and transparent local governance.
- Implemented secure JWT authentication and role-based access control (RBAC) for protected dashboards and admin-only features.
- Integrated real-time voting, notifications, and feedback mechanisms using Socket.IO.
- Built a responsive and accessible UI using Chakra UI with debounced search, interactive dialogs, and profile image uploads.
- Structured the backend with RESTful APIs, modular routing, and middleware for scalability and maintainability.

Tech Stack: React.js, Redux Toolkit, Chakra UI, Node.js, Express.js, MongoDB, JWT, Multer, Socket.IO
